

THE HOLLOW WORLD CHRONICLES

CRAFTING LIST

This is not all the crafting that is available, there are hidden recipes/items that players may develop, invent and improve well beyond what is in this document. These are purely indicative of things considered that players may want to craft.

With the required crafting skill unlocks access to craft from that list and the basic list. You are able to craft your skill level in items per day. If you have access to a unique schematic using this doesn't count towards the number of items you can make per day. (for example a person with 2 points in Gadgets could make 2 compasses and the item off their schematic). You may also try to invent something a number of times per weekend equal to your skill level.

Phys Rep

Each ingredient will come with an ingredient card that requires the relevant phys rep. These cards are broken down into 8 categories which are Vial (eg. testube), Natural (eg. Plants), Medical (eg bandages), Ingot (eg ingot), Paraphernalia (eg. compass), Weapon, Ore (eg. Rocks) and Rounds. All cards will state how many uses it has.

Rounds do not need to be phys repped but can be, the card is used to mark off how many shots you have for your firearms.
